

## MERCEDES CANemu VIN Repair FBS3/FBS4

Automatic search in each module (Send / Request)

Instal on the OBD2 CAN (Full change VIN in all module)

For the change VIN in LCD Screen HU Unit Navigation MAPS,

You need to install an additional emulator on the CAN lines of the Radio.

Renew HU systems , write again Antytheft Code and instal new map with current VIN.

For proper operation, you must enter (VIN to be displayed in diagnostics) and (VIN to be hidden) in the emulator`s memory.

# How Prepare special file to emulator memory?

## 1. Option 1

You can easily prepare that file in SpecTool Mercedes Manager Software in special Tab.

Just enter the correct VIN and VIN to HIDE

Save file and write with external programmer to SPI95640.

## Option 2

Edit file in HexEditor and modified file manually.
