Emulator Wirres

- 1.Can Brown H (brown/white)
- 2.Can Brown L (brown)
- 3.12V - 15 ACC (red)
- 4.GND - 31 (brown)

The emulator must be connected to Brown CAN, and power must be supplied after ignition (ACC).

Recommended connections:

- 1.The location of the Brown Can is behind the Dashboard.

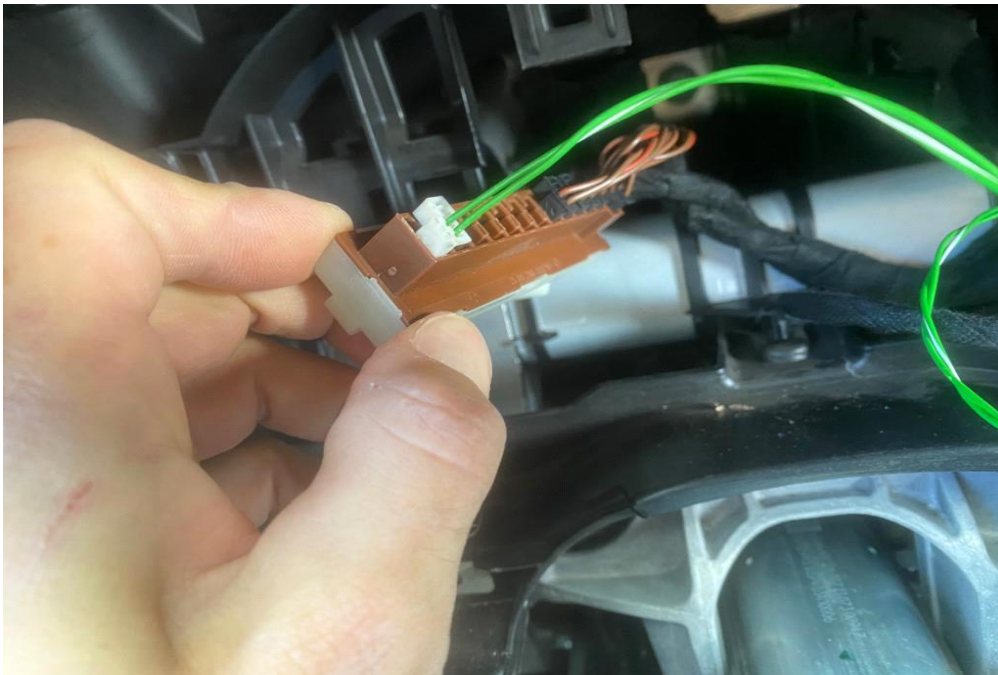

- 2.Unscre the 2 TORX screws

Brown CAN Gate Location

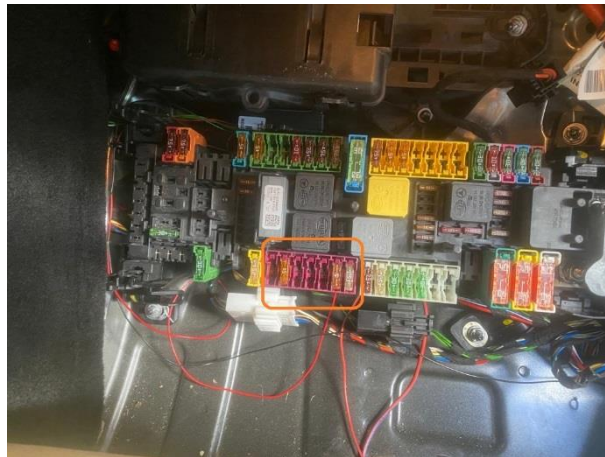

2. Connect Emulator CAN Wirres to Brown CAN Gate

Suggested place for 12V power supply and fuse

12V - ACC (15 After Ignition) - Fuse 5 Amp

GND

Results

After starting the car, the ECU Start Stop System light will automatically turn off after 10-15 seconds.
